Summary

The best and updated information about my expertise is here: http://geo.emisdb.ru.

I am a senior software engineer with 17 years of continuous experience in the web application development. Now based in Batumi, Republic of Georgia.

My main specialization is complex back-end web application with the ample use of interactive elements on modern platforms. Throughout my career, I have worked on a wide range of projects, from large-scale enterprise systems to individually developed solutions, always striving for **clean architecture, efficiency, and maintainability**.

My main technological stack is PHP development with the use of popular frameworks Yii, Laravel, Symfony using databases (MySQL, PostreSQL), server instruments (Memcached, Redis) and web-based platforms (Google Ad, Facebook Ads, Leadspedia) in a big variety of business fields. Extensive experience of frontend development using HTML5, CSS, JS, JQuery, Bootstrap, numerous libraries like Google API, Yandex API, recently focus on Vue.JS with the use of Nuxt.js. Successfully completed 9 (3 in web) projects through individual effort and participated in 6 (all in web) big commercial ongoing projects as a team member during 25 years of my continuous career.
Extended version of this resume is available: http://geo.emisdb.ru/docs/cv_eng_g.pdf
